Video-on-Demand, Broadcast & Video Distribution

**CLIENT PROJECTS**

11 Goddard • Irvine, CA 92618 • Tel: 949.428.6333 • Fax: 949.428.6334

Based on the needs of the district, Digital Networks Group selected a Dukane solution for CATV distribution and media retrieval. The system allows teachers to select cable television channels, schedule media sources, such as VCR tapes and DVDs, and perform live broadcasts directly from their classrooms. In addition, local cabling was installed, linking the teacher's workstation to the television and allowing additional viewing capabilities for the students. Each of the 11 schools has a broadcasting cart so that teachers can share lessons or show video to multiple classrooms within the school. In addition, professional training was provided to ensure the technology coordinators and teachers could operate the system.

**Staffing:**  
Teresa Hadler, Account Manager  
Joe Lamothe, Design Engineer  
Joe Perez, Project Manager

**Project Duration:**  
October 2003 – present
